the **Milford Person Lift**

The Milford Person Lift is designed to smoothly transfer users from a wheelchair directly into a standard car seat, meaning there's no need to change your vehicle. Strong, versatile and easy to detach when not in use, the Milford Person Lift can also be used with the Smartbase for use in the home, on holiday or even in the office.

Lifts people onto the standard car seat in virtually any make or model of vehicle

Simple to install, assemble and operate

No extra lifting required

Can lift up to 330lbs

Can be used in and around the home with the Autochair Smartbase, ask for details

How the Milford Person Lift works

1 Place the sling on the seat

2 Securely attach the sling to the four point lifting attachment

3 Press the up button and then guide the person into the car

4 Unclip the sling and stow the lift ready for travel

Why thousands of people choose the Milford Person Lift

- Can be used for the drivers' seat, or for front and rear seat passengers
- Simple and easy to operate
- Easily transferred to your next vehicle
- Lifting capacity of 330lbs
- Manufactured in the UK
- XS-XL slings sizes available

Standard installation takes just 3-4 hours
